DETAILED ACTION

Formalities

1. Amended claims in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. In particular, claims 2 and 6 appear to contain language machine-translated from the original foreign application. The amended claims filed must be accompanied by a statement that it contains no new matter.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a. Group I, claim(s) 1 through 4, and 13 through 16, drawn to a composition of matter.
 - b. Group II, claim(s) 5 through 8, and 17 through 20, drawn to a method of use.
3. Claim 1 lacks an inventive step under PCT Article 33(3) as being obvious over EP 286903 A1 (Columbia) in view of US Patent 6,271,224 (Kapin, et. al.). Columbia, provided as part of the International Search Report submitted by Applicants, discloses that prostaglandins are useful in the treatment of glaucoma, particularly when used in combination with another agent capable of lowering intraocular pressure (Column 3, lines 14-25). Kapin, et. al. teaches that certain isoquinolinesulfonyl compounds, most preferably the derivative known as fasudil, are effective in lowering intraocular pressure (Column 2, lines 30-34). Fasudil is a member of a

family of compounds of known rho-kinase inhibitory effect. Given the disclosure of Columbia, it would have been obvious to one skilled in the art to combine the prostaglandin disclosed therein with the rho-kinase inhibitor taught in Kapin to achieve therapeutic efficacy in patients with glaucoma.

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
